MARKET SUMMARY:

Equity markets went through substantial swings and moderate appreciation in July. PMI indices kept deteriorating, particularly manufacturing activity had been bleak retreating to levels not seen since Q2 2009. The US corporate earnings season started with rather mixed results, but kept improving throughout July, delivering an overall positive earnings surprise both on the net profit and revenues level. However, the key focus had been on debt concerns and liquidity conditions as periphery yields once again skyrocketed. Equities staged a substantial rally as ECB President Mario Draghi made supportive comments about the eurozone, however, the announcement lacked details. Crude oil recovered following the huge correction in June, helped by both the civil war in Syria and the very low level of the Middle East premium in WTI prices. The fund kept relatively neutral equity weight throughout July, preferring selective raw material linked equities.

ASSET ALLOCATION OF THE FUND ON 07/31/2012
