Net Asset Value of HUF series:	1,140,523,209 HUF
Net Asset Value per unit:	1.485374 HUF

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to provide investors with yields higher than those attainable in the money market, at low risk, through the purchase or sale of securities, options or other derivative products. The fund invests most of its available assets in domestic discount treasury bills and short-term government bonds - which have the purpose of protecting the investors' capital - while using the rest to purchase riskier instruments. Given its approach to the purchase of risky instruments, the fund falls into the category of absolute-return funds: it selects, from among the opportunities available in the domestic and international money and capital markets, the investments with the best expected yield/risk ratio. The fund management company, exercising all due care, based on its own judgement and decisions and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with the our expectations with regard to future risks and returns - achieves its objective in the long term. The Fund offers capital protection for first trading day of every year under special condition. The capital protection is ensured by the investment policy of the Fund.

MARKET SUMMARY:

The central bank had to decide on the base rate again after a difficult month as the currency depreciated since the middle of the month and the bond market was showing signs of weakness as well. The sentiment was further burdened by rumours about different scenarios of the government's reinvented plan to help FX-borrowers. Despite all these the Monetary Council cut the base rate to 4%, as expected. The council also decided to change the framework of monetary policy decisions - supporting growth will now be officially considered. Inflation target and inflation targeting remains but attitudes of the new leadership will be reflected by emphasizing other factors as well. Additionally, Matolcsy sees the end of the rate cut cycle somewhere between 3% and 3.5% and more interestingly, rate cuts might continue in smaller than 25 bps steps.

ASSET ALLOCATION OF THE FUND ON 07/31/2013
