Total Net Asset Value of the whole Fund:	65,559,721 PLN
Net Asset Value of institutional series:	29,714,811 PLN
Net Asset Value per unit:	1.198805 PLN

INVESTMENT POLICY OF THE FUND:

The fund aims to share in the yields of the Polish equity market, and to profit from Poland's economic growth through share price gains and dividend income. Given the risk profiles of the equity investments, the fund is classified as a high-risk investment. The fund manager's intentions are that the fund's portfolio should consist predominantly of the publicly traded shares of foreign-domiciled companies. The fund's primary investment targets are the exchange-traded securities of companies that are active in Poland or that generate the bulk of their revenues there, or whose shares are listed on the Warsaw Stock Exchange. The fund may also invest in the shares of other Central and Eastern European corporations. These are listed as Austria, the Czech Republic, Hungary, Russia, Romania and Turkey; although the portfolio will always chiefly consist of the shares of companies listed on the Warsaw Stock Exchange. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, only publicly issued securities listed or in the process of being listed on the stock exchange will be purchased as equity investments. The fund management company, exercising all due care, determines the means of utilising the fund's resources on the basis of its own judgement and decisions, while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation and by taking into account the macroeconomic environment of the investment markets, relying primarily on fundamental analysis. When compiling the portfolio, it is shares that determine the nature of the fund, and thus the proportion of shares that may be held in the fund at any given moment may reach the prevailing statutory maximum. The weights of the shares within the portfolio are determined so as to ensure that the fund - in line with our expectations with regard to future risks and yields - achieves its objective, which is to outperform the benchmark advertised by the fund, over the longer term. The fund holds more than 30% of its assets in a currency other than the domestic currency (HUF). In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

RISK INDICATORS FOR THE LAST 12 MONTHS:

Annualized standard deviation of the fund's weekly yields:	12.81 %
Annualized standard deviation of the benchmark's weekly yields:	12.92 %

MARKET SUMMARY:

Equities remained volatile throughout December as markets sold off on tumbling commodity prices and emerging currency concerns followed by a bounce back in the second half of the month. With no quick remedy for the supply glut oil prices remained under pressure regardless of the depressed price levels. China once again staged a huge rally with the Shanghai Composite appreciating by 20% in December driven by momentum trade and the benign effects of the lower commodity price environment. European stimulus expectations and the unfolding Greek political turmoil drove the EUR to multi-year lows against the USD, while US equity markets managed to outperform European indices.

All CEE indices declined in December and all sectors fell in the region but telecoms and energy were the worst performers. Polish macro data worsened, retail sales fell unexpectedly, industrial production slowed and unemployment rate increased somewhat. LPP performed the worst mainly due to significant Russian exposure and weak sales figures.

ASSET ALLOCATION OF THE FUND ON 12/31/2014
