MARKET SUMMARY:

A few trends, which had been prevailing in the previous quarters, stalled in April. European equity markets topped at previous highs, the dollar weakened, oil prices picked up and US long rates started to sell off. It is too early to say whether this is a new trend or a simple correction, but no major macro news came out to justify any major change in strategy.

The Fund decreased its currency exposure and opened positions in the energy sector and on Far East equity markets.
