Start:	12/11/2007
Currency:	EUR
Total Net Asset Value of the whole Fund:	8,181,178 EUR
Net Asset Value of EUR series:	582,110 EUR
Net Asset Value per unit:	0.984634 EUR

INVESTMENT POLICY OF THE FUND:

The fund's investment objective is to provide investors with capital appreciation by investing in the sovereign- and quasi-sovereign bond market of Emerging European countries. The fund has no rating constraints, the fund has a permission to invest in any kind of issuer without limitation on its long-term foreign currency debt rating. The fund aims to reach the highest capital gain with rational risk taking. The fund primarily invests on the sovereign- and quasi-sovereign bond market of Emerging European countries denominated in foreign currency, but holds Hungarian local currency, long- and short-term bonds with diversification and liquidity management purposes. The fund may also invest in mortgage backed securities, and short- and long-term, fixed or floating securities of other financial institutions, municipalities or other business corporations, structured and convertible bonds. The fund's general risk level and the measure of the deviation from the target weights are determined on the basis of a regular market analysis and situational analysis relating to four main aspects (fundamentals, valuation levels, market sentiment, technical factors). The core part of the fund consists of the foreign currency denominated, sovereign and quasi-sovereign bonds of Central and Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), Southeast Europe (Serbia, Turkey), Baltic states (Lithuania, Latvia) and the countries of the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and also holds Hungarian local currency bonds with diversification and liquidity management purposes. In case of attractive market conditions (e.g. possible upgrade of an issuer's long-term foreign currency debt rating, change of the yield curve, market mispricing, etc.) the fund may invest in bonds of issuers not listed above. The fund does not intend to invest more than 25% of its assets in a single country. The target weight for the fund's fixed income investments in the above listed countries (target countries) is 95%. The aimed risk profile of the fund is intermediate. We do not use constraints on foreign currency debt ratings. The fund may only conclude derivative transactions for the purpose of hedging or ensuring an efficient portfolio structure. The fund may also hold unleveraged debt-type collective investments linked to derivative indexes. The fund also has the option of taking on a substantial currency exposure, which will ordinarily be fully hedged to the target currency (USD), although depending on market circumstances the fund may even have an open currency position. The investment policy of the fund changed on the 30th of December, 2016. Since then the fund has no benchmark, and fund performance before the change is not applicable.

MARKET SUMMARY:

EM spreads have been under a renewed amount of pressure last month driven by the uncertainty created over trade tension. The situation remains extremely fluid, and will likely need more time for a resolution since the ultimate goal of the Trump administration is the portrayal of a strong stance towards NAFTA, EU-US trade deficit, and finally China's trade and investment practices that threaten US competitiveness. The macro environment has remained challenging with trade tensions still at the forefront and weighing on risk assets. There are some mitigating factors to this outlook that may keep spreads somewhat anchored, including a large amount of cash being returned to the market via bond redemptions, range bound US treasuries and stable oil. However, while valuations are becoming attractive, there is still no catalyst to lead to a sustained rally as investors are still focused on idiosyncratic risks. Two competing cycles continue to drive the outlook for EM markets: global synchronized upturns and tightening US monetary policy. As H2 conditions have come early with markets focused on vulnerabilities given disappointing non-US growth and still rising US rates, EM fixed income assets were left among the worst performing YTD. We decreased exposures in Turkish and Romanian bonds and opened a tactical position in USD denominated 7 year Ukrainian bonds.
