Net Asset Value of institutional series:	1,013,507,973 HUF
Net Asset Value per unit:	1.065512 HUF

INVESTMENT POLICY OF THE FUND:

The fund is intended to serve as a stable, moderately low-risk form of investment, and to offer investors higher returns than bank deposits over the medium term. The portfolio elements are selected in accordance with the above principles. To ensure liquidity, the fund primarily aims to hold bonds and discount treasury bills issued by the State Debt Management Centre on behalf of the State of Hungary, as well as bonds issued by the National Bank of Hungary. The fund has a low risk profile, but its portfolio may also contain forint-denominated debt securities issued by banks and corporations, which are expected to yield a higher return than government securities. The fund may also keep its liquid assets in bank deposits. Besides this, the fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk. Aegon Domestic Bond Fund must hold minimum 80% of its assets in HUF-denominated bonds issued by the members of European Economic Area.

MARKET SUMMARY:

Local rates fell further in December. Global developments played a significant role in this move as oil fell a further 16% in December completing a peak-to-trough decline of more than 40% pushing headline inflation expectations lower. At the same time global growth fears hit the market which resulted in a steep fall in equity prices (S&P500 fell 15% in December until Christmas) and a parallel demand for risk-free assets like core market fixed income. US 10-year yields fell 30 bps in December while the Bund closed at the lowest yield levels in 1.5 years.

The move in local yields occurred despite the central bank being more hawkish at the December meeting than expected, stressing unfavourable core inflation developments and dropping some dovish references from the statement.

ASSET ALLOCATION OF THE FUND ON 12/31/2018
