Net Asset Value of HUF series:	1,518,407,691 HUF
Net Asset Value per unit:	1.268846 HUF

INVESTMENT POLICY OF THE FUND:

The objective of the Fund is to benefit from long term, global megatrends. These trends include demographical changes (aging society, emerging markets), efficiency improvements due to depletion of scarce resources (renewable resources, energy efficiency), urbanization, or even technical developments and innovations. To achieving the main objectives, the Fund primary invests in exchange traded funds, secondly in open-end mutual funds. Megatrends are long term changes that will permanently and significantly alter our social and economic environment. The Fund wishes to invest in companies and sectors likely to benefit from these trends. Thanks to its characteristic, the Fund mainly holds sector and thematic ETFs and mutual funds. Megatrends are very long-term, generally global trends, which are spanning economic cycles. Therefore the Fund invests in global markets without any geographical specification. As the Funds profit from very long term trends and exposed heavily to equity markets, we recommend the Fund for long term, risk seeking investors. The type of the Fund is fund of funds, which, according to their investment policy, have to invest in at least 80% of their assets into ETFs and mutual funds. At the same time, the maximum exposure of each fund is not exceeding 20% of their total assets. The Fund only invests in instruments with total expense ratio below 2.5% and intent to maintain the average expense ratio below 1%.

MARKET SUMMARY:

Donald Trump, the president of the United States in his love me-love me not game august got the latter one. As Xi Jinping was his best friend in July, he became his worst enemy by August. Lately, it is very hard to follow the U.S. president's controversial reasoning, and his inconsistent thinking has an impact on the financial markets. In the last month, there were 2 days when the S&P 500 index fell more than 1%, and 2 days when it fell by more than 2%. It's a miracle that the index closed down the month by only 1,82%. We don't know what the president's true intention is, but it's not helping the investors.

The trade war has multiple aspects. Analysts thought that Trump wants to force the FED to cut rates, and using the trade war as a tool to achieve this goal. But the FED resisted the political pressure, and cut the Fed Fund Rate by only 25bp. Moreover, Jay Powell the chairman of the FED, declared that the only the change in economic data will force the central bank to change its interest rate policy. So far the FED thinks that this is only a mid-cycle slowdown which doesn't justify more rate cuts at this time. Trump didn't like what he heard, and his next tweet he stated that he doesn't know who is the greater enemy of the U.S.: Xi the Chinese president or Powell FED president. Although the fund had a negative return in August, it still over performed its benchmark. On the sector level, the medical device and defense sector had the best performance, we increased the fund's exposure in the latter one. We established a new position in the infrastructure sector. The cannabis and the European exposure had a negative effect on the fund. The fund still 100% invested in equities.

ASSET ALLOCATION OF THE FUND ON 08/31/2019
